# Getting to Know **BED BUGS**

Have you ever heard of bed bugs? They're tiny bugs, about the size of an apple seed, and they're experts at hide-and-seek! They like to hide in beds, couches, and even your clothes. And they're not good playmates.

Why are bed bugs bad? Well, they like to bite people when they're sleeping to get a little snack of blood. Yuck! Bites won't make you sick, but it can be itchy and uncomfortable. We don't want these tiny critters turning our homes into their snack bars!

What can we do to keep bed bugs away? Keep your room clean, hang your backpack on a hook, and don't leave clothes on the floor. If you go on a trip, make sure to check your hotel bed for any signs of these little bugs. Keep your luggage off the floor. And if you think you see one, tell an adult right away!
