

## What to Do Before and After Bed Bug Product Treatments

### Our common goal is to get rid of your bedbugs.

Success requires partnership and everyone working together. We will do our part and you also need to do yours.

**If you are renting**, your property manager will tell you when we are coming to treat your apartment, and ensure that you have plenty of time to follow the preparation steps below. If you are unable to comply with these pre-treatment requirements, please inform your property manager immediately.

### What you need to do before we come to treat:

- Aerosols and Pressurized Cans, Cylinders and Containers
- All Flammable Liquids and Solvents
- All Explosives and Ammunition
- Candles, Wax figurines, and Oil Paintings
- Musical Instruments that may be damaged by the heat
- Makeup
- VCR tapes

### The following items must be placed in the refrigerator:

- Chocolate and other "meltable" foods
- Fresh Produce
- Medicines that can be refrigerated

### Remaining liquids must be placed in the bathtub or shower because they could leak or break from the heat.

- Valuable liquids can be placed in the "DO NOT HEAT " box.

### Other important instructions - PLEASE READ:

- Unplug all electronics
- Take down wall mounted pictures and other items
- Secure knick knacks
- Place loose paperwork in boxes (we use powerful fans to circulate the heat)
- Drain waterbed or airbed
- REMOVE ALL TRASH, seal it in bags and place in a dumpster
- Empty and open all suitcases
- Roll up area rugs and all other unsecured floor coverings and stand on end
